SPEEDCRETE™
PROFESSIONAL CONSTRUCTION EQUIPMENT

Hire it!

Bunyan Striker Units and Tubes

- Hydraulic Power Pack - Petrol
- Hydraulic Power Pack - Diesel
- Tubes from 2.0m to 10.5m

ROTOSCREED

For bay widths up to 5.6m, this small diameter striker tube driven direct from a Honda engine is great for small pours where access is difficult or where larger units are impractical.

- Tubes from 2.0m to 6.0m

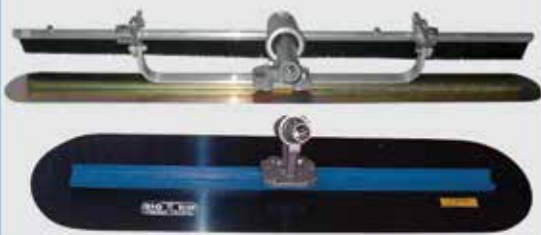

Multivibe Screeder and Floater Bars

- Floater bars 1.8m, 2.4m, 3.0m, 3.65m, 4.2m & 4.8m
- Screeding Machine

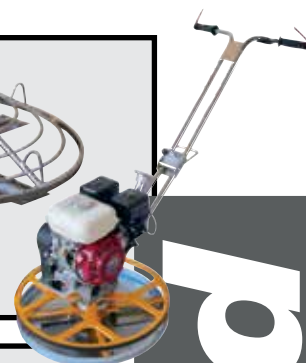

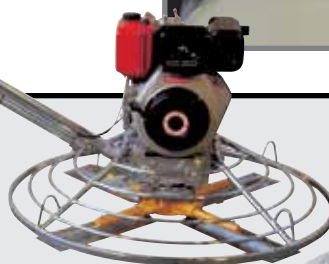

Hand Finishing Tools

- Big Blue (also known as 'easy floats' or 'flip-flop floats') for achieving a smooth finish to the concrete surface.
- Fresno Broom complete with medium head (other grades subject to availability) for achieving a brush textured finish.

Pedestrian Powerfloats

- 36" Pedestrian c/w Blades and Pans
- 24" Pedestrian c/w Blades and Pans. Edging Float - 'up close and personal'.

Ride-On Powerfloats

- 4 Blade twin 30" Rotor
- 4 Blade twin 36" Rotor
- 5 Blade twin 46" Rotor

Vibratory Pokers

- Lightweight Hummer c/w 1.2m shaft & a short 2" head
- Electric High Frequency

Roller Screeds

The striker is a hydraulically driven steel tube pulled across the wet concrete at 230 r.p.m. The tube rotates in the opposite direction of travel creating a positive grasp of friction gathering up to 150mm of concrete build up, which tumbles ahead of the spinning tube.

What will it do?

- **Helps to place the concrete**
As well as providing finished level
- **Flatter Slabs**
Less ripples, bumps and hollows than conventional screeders
- **Matrix undamaged**
By leaving the major aggregates close to the surface, a more dense and durable slab results
- **Pass and Re-pass**
Grade flaws easily recognised and eliminated with ability to re-pass over the strike area at will
- **Variety of bay widths**
Tube lengths from 2.0m to 10.5m

Benefits

- All units are hydraulically driven
- Top of the range for **POWER & RELIABILITY**
- May be sited 10-12m from the pour area and is connected with twin hydraulic hose to the control driver

Model Options

Diesel • Kubota OC95-E Power Unit

Petrol • Honda 4 stroke engine GX340

Part No.	Description
BSDU	Bunyan Powerpack (Kubota Diesel engine, control driver and T-bar handle)

Other specific lengths can be manufactured to order for purchase.

Hot-end

BS45606

Cold-end

BS45607

Use our 'Conehead' system

These removable end units allow our customers to re-use worn out tube and to purchase straightened 'bare-end' tube only. Quick and easy to change they make our Bunyan Striker system even more versatile.

The Kerb Crawler

This device (named after a famous English actor) fits to the cold end of the striker tube and permits screeding right to the kerb face. They provide adjustment from a minimum concrete level of 50mm below kerb height to a maximum of 240mm.

Part No.	Description	
Kerbcrawl	Standard height	80mm – 140mm
Kerbcrawl(L)	Higher kerbs	150mm – 240mm

The 'Tube Saver'

A new addition to our range of practical innovations. Use the 'tube saver' on the free-running 'cold end' of the Striker tube to stop the end being worn away when running on the cast edge of an existing concrete slab.

Bunyan Striker Accessories

Slope Kits

Manual system - includes double pulley blocks, shackles, securing stakes and rope gear.

Mechanical system - includes double drum winch and is hydraulically operated.

Suggested maximum length of tubes for slope work is 6.4m.

Conical Tank Kits

The Bunyan Striker can be used in the construction of in-situ concrete conical tanks. Special bracketing can be supplied to suit all designs of conical tanks, whereby the cold end of the Striker tube is supported from the centre fulcrum point of the sump well. This ensures tight tolerances and the correct radius grade.

Mini Roller Precast Kits

The rollerscreed system can be used in various formats within precast factories. We have many customers who use the traditional Bunyan striker for large wall and floor panels, but through our years of experience, we have also developed bespoke designs for numerous applications including tunnel segment manufacture.

Call us to discuss how we may be able to help your company!

Special Applications

Many projects demand new and innovative ways of laying and levelling concrete. Speedcrete have developed many different systems that have been used on projects in various countries. The picture shows a roller system complete with 'crown tubes' used on a high speed rail link. If you have a problem we may be able to help.

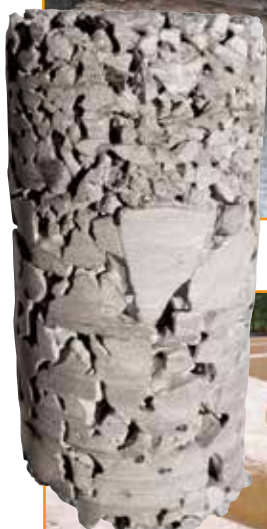

Pervious Concrete

Pervious concrete is the latest in green and sustainable construction methodology. Designed to allow water to soak through the concrete surface it helps prevent a host of problems including erosion, flash floods, water table depletion and pollution of rivers, lakes, and coastal waters as rainwater rushing across pavement surfaces picks up everything from oil and grease spills to deicing salts and chemical fertilizers.

We can offer all the tools and equipment that you will need to lay pervious concrete.

Can be decorative too!

- Lightweight.
- More compact.
- New Hydraulic Drive System Honda 4 stroke engine.
- Cost effective and economical to buy and operate.
- Engine and gearbox mounted on the end of the tube.
- Ideal for small pours and metal decking.
- Easily connected and dismantled.
- As with all tubes – easy to clean!
- Can be used with 6" or 4.5" Diameter Tubes.

Power Screeds

Razorback® Truss Screed

Air Screed

Featuring the same quality steel frame as our engine screed, our air screed models feature specially designed, precision engineered naval bronze piston vibrators placed at 30" (762mm) centres. These vibrators provide concrete consolidation of low slump mixes. Allen's vibrators are rust resistant, non-sticking and free starting for long life.

Available
in Steel or
Aluminium

Accessories

- **Pivot bracket**
– use your Razorback screed to form an accurate circular tank base slab.

- **Screedcart**
– moves your screed quickly and easily.

- **Adjustable end bracket**
– rides on forms or kerbs. Horizontal and vertical adjustment and available with or without rollers.

Petrol Driven Screed

Winches

Shown with optional heavy-duty hydraulic power winches. Manual winches are standard.

Engines

Engine options from 9 or 11hp are available in low profile, end mount, or straddle mount configuration.

Top Pipe Coupler

Fine thread enables correct level control.

Eccentric Vibrators

Custom engineered Rotating Eccentric Shaft (RES) vibratory system imparts maximum workforce for concrete consolidation.

Bearings

Replaceable low maintenance grease-type bearing for long life.

Triangular Frame

Steel or aluminium rods with vibration-proof welds for dependability and long life.
600mm, 760mm, 1500mm and 2300mm sections.

Model Description

SA12	Steel, heavy-duty, air-operated, span up to 19.8m
SE12	Steel, heavy-duty, petrol operated, span up to 19.8m
AE12	Aluminium, c/w steel blades, petrol operated, span up to 15.2m

Power Screeds & Workbridges

Triple Roller Tube Pavers

Precision engineered tubes ensure the smoothest pavement possible. Powered by rugged Petrol or Diesel engines, with easy to operate control systems, the Triple Roller Tube Paver can strike off concrete fast. With our precision engineered and level-tested roller tubes, you can be assured of producing the flattest paving job possible. Three models available or customisable to your specifications.

Laser Kit

Part No.	Description
LS100	Laser staff Base plate 100 x 100mm
LS200	Laser staff Base plate 200 x 200mm
LS300	Laser staff Base plate 300 x 300mm
Receiver not included	

Part No.	Description
RL-H5	Topcon Laser Kit Other models also available

DRILL SCREED

PR100D

Part No. Description

PR100D	'Drillscreed' with two handled screed assembly c/w Milwaukee M28 drill kit
D28	Drill kit - includes drill, 2 lithium-ion batteries, mains charger in plastic carry-case

When constructing wide bay slabs and mass pours use our Multivibe Powerscreeds. Spot level in the wet concrete with a laser level, rake & then use the powerscreed to level and vibrate the concrete.

Double Beam Screed

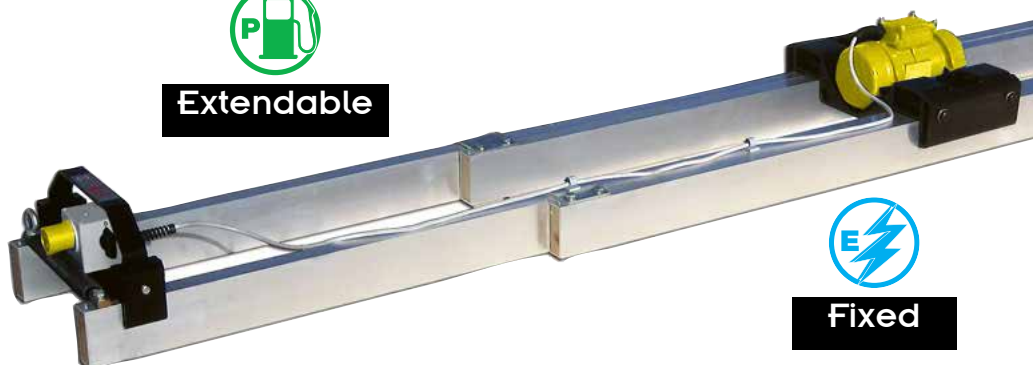

- Hard wearing durable power screeds.
- Available in extendable or fixed length units.
- Petrol or Electric power options.
- Steel Beams.

PRT364

26hp Honda, Stick steer control. Advanced design features to assist with on site operation. All new super heavy duty (SHD) gear-boxes. 4 blade (90cm) rotors, 4 LED work-lights and power water spray system. 320kg.

PRT465

35hp B&S, Stick steer control. Advanced design features to assist with on site operation. All new super heavy duty (SHD) gear-boxes. 5 blade (120cm) rotors, 4 LED work-lights and power water spray system. 320kg.

TV830 Topping Spreader

The TV 830 is of robust design and can be handled by one operator. The 830mm screen roller carries the weight of the machine and presses the material on to the concrete surface.

Duo-Top Topping Spreader

Twin Balloon Wheeled spreading machine for toppings and colours.

Invertor Generator

Powerful 8KVA Pure-Sinewave Invertor generator. Dual Voltage 230/110V. Can run sensitive electronics & runs Metal Halide lights 'flicker' free.

Gorilla™ Bucket & Tubs

Almost indestructable, these buckets are fantastic for a multitude of site based activities

Bulldog Shovels

Heavy Duty - Site Tough Shovels will give years of prolonged use. Available in a variety of styles & sizes.

Gorilla™ Shovel

Lightweight composite shovel great for loading and manual tasks. Far easier to clean than steel versions

119/1PP/Y

Measuring Bucket

Metric & imperial measures

Code	Size	Type
TC75Y	Xtra Large 75 Litre	Flexible Tub

Site Equipment

Jetwash

EVO-JW GK

Evolution Tools Mitsubishi Engine with Jetwash & Generator Attachment

EVO-JW

Evolution Tools Mitsubishi Engine with Jetwash Attachment

One Mitsubishi engine unit powers a range of compatible attachments providing you with a flexible & versatile machine whilst saving you

money. It's unique quick release coupling allows easy output connectivity and removal - it takes seconds!

Extra Attachments are available to add on to create a versatile kit that can be used for multiple on site tasks.

Chute Scrapers

Really useful, lightweight tool.

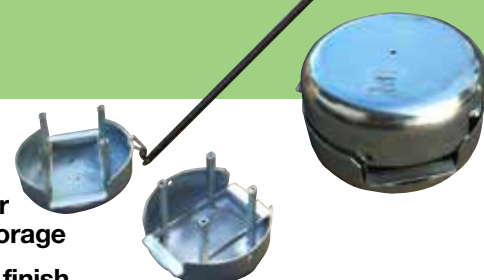

Code	Description
CHUTE	Composite Chute Scraper
CC987H	Aluminium Chute Scraper

Speedcrete Pump Hose Disc PD600

Twin Pump Hose Disc Set PHSK

- comes complete with handle
- clamshell design for easy transport & storage
- durable zinc plated finish

Sprayers

Mesto Profi Plus Sprayer - 3270P

10 litre Plastic tank, Viton seals

Mesto Sprayers are made from the best materials and exceed the most exacting industry standards. Producing the highest quality sprayers for 100 years, Mesto utilizes the latest Viton™ FPM seals in its sprayers for the most aggressive chemicals.

Mesto Primer Sprayer - 3237P

5 litre plastic tank, Viton seals

Mesto Cleaner NX Hand Sprayer - 3132NG

1.5 litre Viton seals

Inox Backpack Straps - 3961N

Mesto Inox Plus Cart Sprayer - 3615FT

10 litre stainless steel tank, Viton seals, Integrated air Valve

Bitumen Sprayer & Concrete Curing Sprayers

SPRAY/PU/L

Cold emulsion bitumen sprayer.

SS-25LTR

- Sturdy 3-wheeled trolley frame
- 205 litre drum capacity
- Honda 4-stroke engine
- Telescopic lance with 6.5m hose
- Easily moved and steered
- Gear pump with overload valves

Code	Description
SPRAY/PU/L	Cold emulsion bitumen sprayer with Honda engine
SS-25LTR	Speedspray Pro concrete curing sprayer (takes 25 litre drums)
SS205-LTR	Speedspray Pro concrete curing sprayer (takes 205 litre drums)

SS-205LTR

Mould Oil

- Standard form-oil for use with road forms and shuttering.
- New 'GREEN' option also available made from vegetable oil – ask for details (add 'G' to part no.).

Part No.	Size
M05	5 litres
M025	25 litres
M0205	205 litres

Liquid Release

- Liquid release helps prevent adhesion or pickup of imprint rollers when applying a textured surface to slabs - see pg 37

Part No.	Size
LR	20 litres

Speedyshield

- Equipment, Form & Vehicle Coating
- Keeps your image and investment looking shiny and new.
- Easy to use and apply
- 100% biodegradable, non toxic, non flammable, non corrosive, low odour.
- Cuts labour time for cleaning trucks and equipment
- Reduces cleaning chemicals necessary

Code	Volume

Speedyclean

CONCRETE DISSOLVER

Why you should use it!

- 100% Biodegradable - kind to the environment
- Non Hazardous - no special storage
- Will not damage tools or equipment
- Water Neutralised - safe to flow down drains
- Easy to use
- Increases safety - no chipping or using harmful chemicals
- Non Harmful - won't harm paint, rubber, plastic, grass, or metal
- Low Odour

Sealers & Dustproofers

Market Leading Industrial Floor Sealer

- Sikafloor®-ProSeal Pro is a clear acrylic resin polymer solution.
- Sikafloor®-ProSeal W is a one part water dispersed acrylic emulsion.
- When using Proseal Pro, use Xylene Thinners to clean sprayers and equipment.

Sikafloor Proseal cures, seals and hardens concrete

Name	Part No.	Size
ProSeal Pro	PRO/25	25 litres
ProSeal W	PRO/25W	25 litres
Xylene Thinners	XYLOL	5 litres

How Concrete Dissolver works

Concrete Dissolver contains active substances that break down the molecules that bind the cement together with sand and water.

Concrete Dissolver is mixed with water to the desired strength and applied as a foam to the item concerned, using for example, a handheld foamer. The foam should be left to act on the concrete for 20-45 minutes. Then clean off the item thoroughly with a high-pressure cleaner or with water and a stiff brush. In cases where there is heavy build-up, the treatment can be repeated.

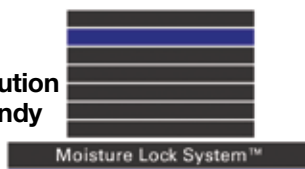

Code	Volume
LCLE808-05	0.6 litres
LCLE808-50	5 litres
LCLE808-02	19 litres
LCLE808-55	200 litres

Curing Compounds

Aquacure® water based curing compound

- Aqueous sodium silicate solution gives protection on hot & windy days
- 90% Efficiency Pro Version gives exceptional performance & protection by creating a layer over the surface to prevent early water evaporation

AQUACURE S

AQUACURE PRO

Name	Part No.	Size
Aquacure	CUR/25	25 litres
Aquacure Pro	CUR/25P	25 litres

Surface Retarders

Retarders are typically used to allow removal of surface laitence to produce an exposed aggregate effect for walkways & paths.

Can also be used to create a 'key' for further surface coatings.

Foaming Sprayers For efficient application of Speedyclean

3132FO Foamer

- Manual Compression Foamers that will work anywhere
- Ideal for application of cleaning chemicals on plant equipment to prevent run-off.
- Gives solid 'Snow Foam' that clings to surfaces to help chemicals work
- Available in two handy sizes

Part No.	Size
3132FO	1.5 litres
3270FO	8 litres

3270FO Foamer

Foam Pro

Compressed Air Powered Foamers

Our Foam Pro series of compressed air powered foamers offer a convenient solution to the application of a variety of chemicals.

Many cleaning solutions are hard to apply in liquid form and need a method to bind to the surface to allow the solution to act. The Foam Pro offers two machines in one as it utilizes a two head system. One for spray application and one for foam application. This allows for the application of a great variety of chemicals.

The Foam Pro's are manufactured in Stainless Steel and feature a trolley solution for easy transportation around the work area.

High Frequency Electronic Vibrators

Our new range of electronic vibrators represents a significant technological advance over conventional high frequency vibrators. The electronic converter is integrated within the transmission, eliminating the need for stand alone converters, commonly used, thereby offering greater versatility for many applications.

The electronic components are well-protected against power surges and vibration, offering greater safety, reliability and handling.

LOW HARM High Frequency Electronic Vibrators

This new High Frequency Vibrator has been designed through input and suggestions of users themselves. Amazingly low HARM figures under 0.5 s/m2 A8 via isolation damper system allows long operator work times. Flex length can be customised.

Saw Blades

A complete range of Husqvarna saw blades for hand cut-off saws and floor & road saws are available.

Please contact us for full range and to discuss your requirements.

Standard duty blades for concrete are:

S45 – 25.4mm bore for hard concrete for use with floor saws

S85 – 25.4mm bore for asphalt and green concrete for use with floor saws (up to approximately 7 days after pouring)

CM15 – 20.0mm bore for concrete for use with standard cut-off saws

Please specify diameter.

Stake Extractors

Code Description

BR/EXT	'Big Ron's' Red Road Pin Extractor
--------	------------------------------------

Stake Extractors that work!

- Pulls stakes and pins straight up
- No bent or buried stakes
- Faster and easier stake pulling
- Heavy gauge steel and clear zinc plating
- Removes 16mm and 22mm round stakes
- Pulls stakes on curves and on soft ground

Code	Description
JJ0100	400mm (14") tall
JJ0200	830mm (29") tall

Formwork Systems

SPEEDFORM

The Speedform system employs two types of form, one for straight work that has a metal core for rigidity and a flex form to create superb curves. In addition the roadpin can be placed at any point along the length of the form, with the steel pockets, that simply twist and lock in long the form length. The slide pockets are typically employed at a join to 'reinforce' a connection. Stacking pockets allow the formwork to be stacked on top of one another to increase the depth of the formwork.

Slide Pocket

Twist Pocket

Stacking Pocket

- Lightweight • Versatile • Re-useable

K Form

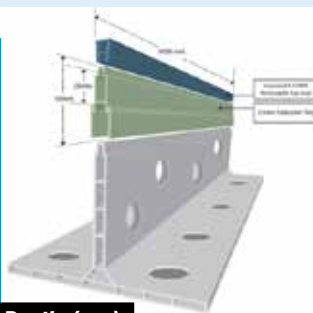

K-Form is lightweight, durable and does not require removal after placement of concrete.

It is easily cut to length on site and has pre-drilled holes for placement of dowel bars in the vertical section.

Ideal for infills and linear drainage projects. Top strip can be removed and sealed or left in-situ.

Available in 3 sizes for slabs from 50mm to 225mm with optional 25mm top strip risers. 3mtr length.

Concrete Covers

Speedcrete are pleased to offer our unique 'Speedtent' which is available in a variety of sizes to suit most bay widths up to 8.0m.

The wedge shaped, 'low-slung' design assists in the tents ability to withstand winds of reasonable intensity.

Simplistic in concept the 'Speedtent' can be transported by small trucks.

A series of tents can be utilised to cover longer bays by using a combination of standard and over-lap units.

Manufactured to order. Leg height can be specified.

High Strength Durable PVC Covers

Frost/Curing Blankets

Heated Blankets

Powerblanket® Concrete Curing Blankets provide a manageable way to cure concrete in the cold weather months.

Save time and money by protecting your business from the havoc of cold weather. Powerblanket® heated curing blankets come in various lengths and sizes. So whether your job is big or small, simple or complex; Powerblanket® has you covered.

- Cure concrete 2.8 times faster than conventional insulated blankets
- Increase early age strength development
- Maintain moisture throughout hydrating process
- Easily installed and removed
- Drum & IBC heaters also available

Basic Frost Blankets

Closed cell polyethylene foam.

* 32 amp plug required

All New Heavy Duty Curing / Frost Blankets

Our new heavy duty frost blankets have been designed to overcome the issues of the cheaper Miothene blankets which have a tendency to curl and lift.

A reinforced PVC cover protects the insulated core providing a blanket that provides durability and one that stays flat ensuring the slab is properly protected.

The cover is dual sided to reflect heat during the summer and draw heat in the winter.

Featuring Brass eyelets at 1mtr intervals around it's border allows for securing the curing blankets during high winds.

Dual Use Cure & Frost

Code	Description
FRPVC63	6m x 3m Thermal Blanket

Brass Eyelets

Big Blue

A blue carbon steel float to provide a super smooth finish.

When used in combination with the BUNYAN STRIKER TUBE, the requirement to powerfloat is often unnecessary eg house bases, sewerage treatment projects, etc.

Supplied with knucklehead gearbox for float pitch variation.

Other sizes available to order.

Can be supplied with handles on each end for use in precast factories.

Complete with heavy duty knucklehead

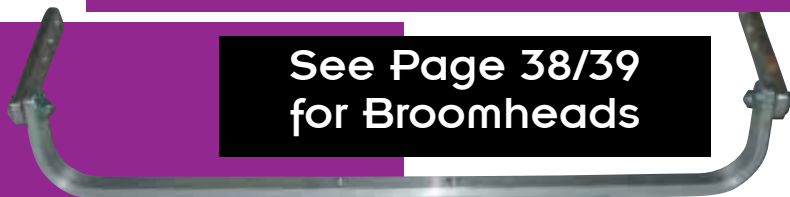

Part No.	Size	Weight
704417	600mm x 300mm (2ft x 1ft)	2.7kgs
704418	900mm x 300mm (3ft x 1ft)	5.0kgs

704420	1500mm x 300mm (5ft x 1ft)	7.8kgs
704421	1800mm x 300mm (6ft x 1ft)	9.5kgs
704422	2400mm x 300mm (8ft x 1ft)	11.4kgs

Blade only, also available

Float Adaptor Bracket

The broom/float adaptor bar can be used with a combination of tools such as the Magnesium Bullfloats Big Blue Floats (see above) or Channel Radius Floats. Easily adjustable broom angle.

See Page 38/39 for Broomheads

Part Number	Description
380211	Broom/Float Adaptor Bar

Aluminium Snap Handle

These handles fit almost all finishing tools. Larger diameter generally used with Bull Floats and smaller diameter handles with Walking Edgers, Grooving tools etc.

Part No.	Length	Diameter
CC336B	1800mm (6ft)	35mm (1 3/8")
CC289SG	1800mm (6ft)	45mm (1 3/4")
CC293SR	2400mm (8ft)	45mm (1 3/4")
CC291SR	3000mm (10ft)	45mm (1 3/4")
CC289-02	Insert with Button Clip	35/45mm
CC289-01	Replacement Spring Button	

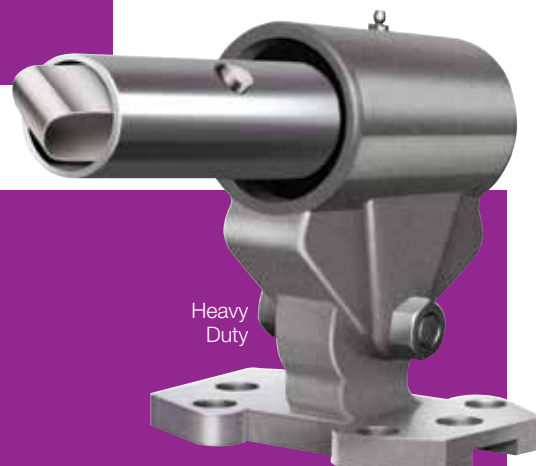

The Knucklehead

Orbit-er

Lightweight

The isometric design holds blade at the desired angle for easier floating. Uses 45mm handles.

Heavy Duty

Part Number	Description
CC296	Heavy duty Knucklehead cast aluminium
CC270	Orbit-er Knucklehead
LWTKHEAD	Lightweight Knucklehead (composite)

Bull Floats

These lightweight and long wearing magnesium floats are made from the finest extruded magnesium. Multi-ribbed top provides extra strength.

The blades are properly curved and balanced to prevent digging.

**Blade only,
also available**

Magnesium Bull Float with Knucklehead

Comes complete with heavy duty knucklehead gearbox.

Kraft Pack

Make your Magnesium Bullfloat, Big Blue or Fresno easy to carry & transport with the neat Kraft Pack system.

Part No.	Size
CC736	900mm x 200mm (3ft x 8")
CC803	1200mm x 200mm (4ft x 8")
CC804	1500mm x 200mm (5ft x 8")

Add '-01' to part number for blade only.

Add 'K' to part number for blade, Khead & 3 x 1800mm snap handles.

Part No. Description

CC1011	48" (1.2m) Round end magnesium bullfloat kit incl. knucklehead, 4 no. snap handles & carry-case.
CC1001	Carry Case only

Groover Bits for Bull Floats

By using our bronze groover bit 'dummy' joints can be formed whilst floating the surface.

Part No. Bit Depth

CC940	19mm (3/4")
CC941	25mm (1")
CC942	38mm (1 1/2")
CC943	50mm (2")

Curved Fresno Trowel

Used on shotcrete and skate parks.

Part No. Description

CC914	600mm Curved Fresno Blade only
-------	--------------------------------

Plexiglas Bull Floats

Used for floating concretes that have high adhesive factor. (Nothing sticks to it - like a Politician.) Ideal for the finishing of Air Entrained concrete and micro silica.

Part No. Description

790399	900mm x 250mm c/w knucklehead
790400	1200mm x 250mm c/w knucklehead

Blade only also available.

Mahogany Wood Bull Float

This selected wood grain 200mm wide bull float is available in two sizes to suit knucklehead.

Part No. Description

CC985	900mm wood float c/w knucklehead
CC986	1200mm wood float c/w knucklehead

Blade only also available.

Magnesium Channel Floats

The Bigger the Float the Flatter the Floor

This Channel Float combines strength and lightness, allowing you to float a larger area more economically than other floats. Great for use on high tolerance floors.

DUAL EDGE Magnesium Channel Radius Float with Knucklehead

Supplied with heavy duty knucklehead gearbox

- Round ends to reduce lapmarks
- Rounded front edge for floating
- Square 90° back edge for cutting

Part No.	Length	Width
700571	1200mm (4ft)	150mm (6")
700572	1500mm (5ft)	150mm (6")

Outrigger Sets for Channel Radius Floats

Outriggers and Braces for Channel Floats
or Bump Cutters.

Part No.

- 790277 Outriggers and Braces
Recommended on Floats 2.4 metres and above
- 790279 Clevis Pin and Yoke
For attaching outriggers to float (2 required)

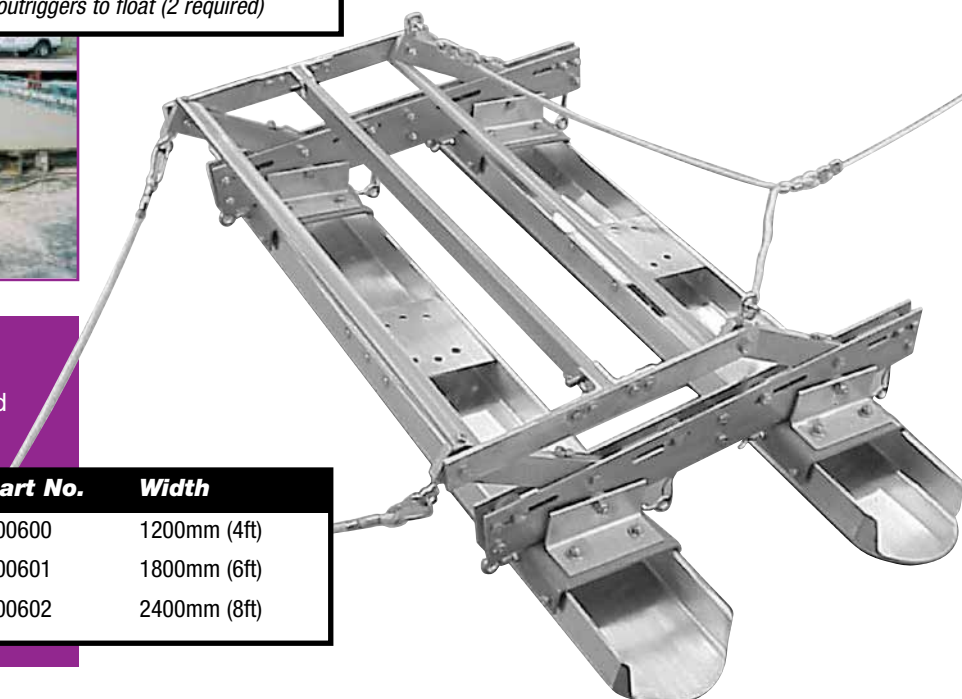

The 'Double Boy'

This double channel float gives an even and consistent float surface. It features automatic adjustment of the float level no matter which way it is pulled.

Especially useful on P.Q. (pavement quality) work and low slump concrete.

Use on wide bays where access for traditional handles is limited.

Part No.	Width
700600	1200mm (4ft)
700601	1800mm (6ft)
700602	2400mm (8ft)

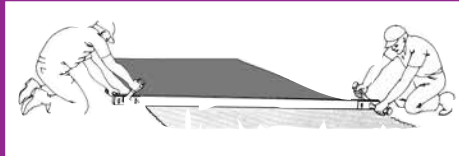

Hi-Tolerance Flooring Tools

Saw beams

Our saw-beam handles can be attached to either our magnesium tamp beam or aluminium screed beam (see Page 40) for increased surface flatness and tolerance. Used in conjunction with a 'bump cutter' it can produce super flat floor specifications.

Ergonomic handle design and slotted connection provides for wear adjustment and includes rubber grips.

Part number	Description
700174	Saw Beam Handle set

Traditional Bump Cutter

A tool for smoothing and flattening the surface of plastic concrete. Typically used for attaining super flat and high tolerance floors as well as removing high spots from other concrete types including Pavement Quality.

Part No.	Description	Size
400150	Complete unit including heavy-duty knucklehead and stainless steel outriggers & 3 snap handles.	3000mm long – 125mm x 50mm (10' long – 5" x 2")
400155	Complete unit including heavy-duty knucklehead and stainless steel outriggers & 3 snap handles.	3650mm long – 125mm x 50mm (12' long – 5" x 2")

Replacement Parts

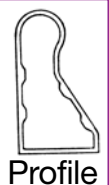

Brackets available separately.

Part No.	Description	Size
400149	Beam complete with brackets only	3000mm long – 125mm x 50mm (10' long – 5" x 2")
400154	Beam complete with brackets only	3650mm long – 125mm x 50mm (12' long – 5" x 2")

Lightweight Bump Cutter

New style lightweight magnesium extrusion provides immense rigidity. May be used as a bump cutter or flat edge checking tool. Especially useful with Laserscreed machines.

Part No.	Description	Size
400160	Complete unit including knucklehead and outriggers & 3 snap handles.	3000mm long – 118mm x 60mm (10' long – 4 ⁵ / ₈ " x 2 ¹ / ₂ ")
400165	Complete unit including knucklehead and outriggers & 3 snap handles.	3650mm long – 118mm x 60mm (12' long – 4 ⁵ / ₈ " x 2 ¹ / ₂ ")

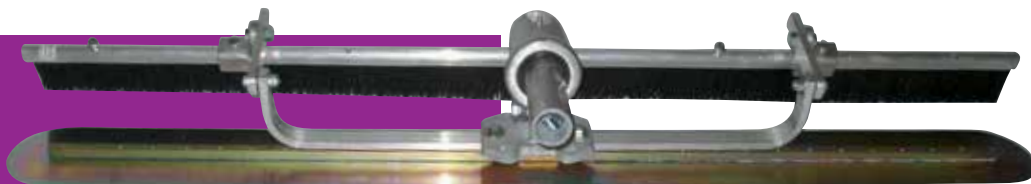

Replacement Parts

Part No.	Description	Size
400159	Lightweight beam, brackets and outriggers.	3000mm long – 118mm x 60mm (10' long – 4 ⁵ / ₈ " x 2 ¹ / ₂ ")
400164	Lightweight beam, brackets and outriggers.	3650mm long – 118mm x 60mm (12' long – 4 ⁵ / ₈ " x 2 ¹ / ₂ ")

Fresno Broom

A Zinc plated steel float incorporating float adaptor and a texturing broom. The brooms are manufactured in polybristle, available in Hard, Medium or Soft textures. The brooms may also be supplied with a steel filament brush (to BS specifications) in widths of 900mm (3ft) and 1200mm (4ft) only. Floats have radius ends to prevent lap marks and come complete with a heavy duty KNUCKLEHEAD gearbox.

Part Number	Length	Float Width	Broom Texture
380100	900mm (3ft)	125mm (4 1/4")	Soft
380101	900mm (3ft)	125mm (4 1/4")	Medium
380102	900mm (3ft)	125mm (4 1/4")	Hard
380103	900mm (3ft)	125mm (4 1/4")	Wirebroom
380104	1200mm (4ft)	125mm (4 1/4")	Soft
380105	1200mm (4ft)	125mm (4 1/4")	Medium
380106	1200mm (4ft)	125mm (4 1/4")	Hard
380107	1200mm (4ft)	125mm (4 1/4")	Wirebroom
380108	1500mm (5ft)	125mm (4 1/4")	Soft
380109	1500mm (5ft)	125mm (4 1/4")	Medium
380110	1500mm (5ft)	125mm (4 1/4")	Hard

Part No.	Dimensions	Description
380300	900mm (3ft)	Blade only
380304	1200mm (4ft)	Blade only
380308	1500mm (5ft)	Blade only
380211	—	Float Adaptor
380356	—	'T' Bracket (wire broom)

Polybristle Finish Brooms

Standard Poly Broomhead. Use with an adjustable wood handle or snap adaptor. Removable brush strips provide a choice of brooming textures.

Part No.	Broomhead Complete	Length
380150	Soft	900mm (3ft)
380151	Med	900mm (3ft)
380152	Hard	900mm (3ft)
380154	Soft	1200mm (4ft)
380155	Med	1200mm (4ft)
380156	Hard	1200mm (4ft)
380158	Soft	1500mm (5ft)
380159	Med	1500mm (5ft)
380160	Hard	1500mm (5ft)
701077	Adjustable Wood Handle only	
CC284	Snap Handle Adaptor 45mm	

Part No.	Replacement Strip only	Length
380200	Soft	900mm (3ft)
380201	Med	900mm (3ft)
380202	Hard	900mm (3ft)
380204	Soft	1200mm (4ft)
380205	Med	1200mm (4ft)
380206	Hard	1200mm (4ft)
380208	Soft	1500mm (5ft)
380209	Med	1500mm (5ft)
380210	Hard	1500mm (5ft)

Polybristle Strip only

Steel Finishing Brooms

Primarily used for concrete texturing on motorways, airport aprons and taxiways.

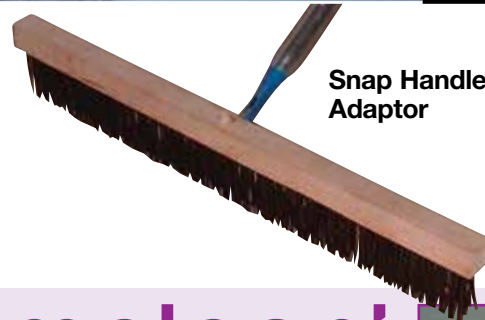

Available with a 1500mm wooden handle with support brace.

Alternatively, they can be supplied with an adjustable wooden handle or snap handle adaptor (requires steel bracket).

Fixed Wooden Handle

Part No.	Width	Description
DECK	300mm (1ft)	Fixed Wooden Handle
330001	600mm (2ft)	Fixed Wooden Handle
330002	900mm (3ft)	Fixed Wooden Handle
330003	1200mm (4ft)	Fixed Wooden Handle
330008	900mm (3ft)	Broomhead only
330009	1200mm (4ft)	Broomhead only
330012		Steel Bracket c/w bolts only
701077		Adjustable Wood Handle only
CC284		Snap Handle Adaptor 45mm

Snap Handle Adaptor

Adjustable Wood Handle

The 'Chameleon' The concrete finishing rope brush

This handleless concrete finishing rope brush is the most versatile concrete finishing system on the market.

- Is **EXCELLENT** in **CONFINED AREAS**
- Is able to **FINISH 50% to 75% FASTER**
- Offers a **UNIQUE ANGLE ADJUSTMENT**

The CHAMELEON TRAC II patented handleless concrete finishing rope brush is a twin brush concrete finishing system that is pulled from side to side by ropes eliminating handles and width restrictions, which makes it excellent in confined areas where handles are awkward or on those wide pours where handles won't reach. It offers three textures with color-coded brush refills and comes in 4', 6', and 8' widths to save you time and money.

...or with handles

The CHAMELEON TRAC II handleless concrete finishing rope brush easily converts into two individual concrete finishing brushes to be used with handles if required.

Concrete Texture

Serrated Bullfloat

This all cast float is available with a 9mm on centre groove spacing only.

Grooves 75mm long from leading edge of float, c/w heavy duty knucklehead.

Where a brush finish is not enough

Part No.	Size	Description
390116	1050mm x 200mm	Serrated Bullfloat
Add "A" to part number for blade only.		

Cast Rumble Float

Designed to form harsh rumble 'wake-up' strips in paving or median strips. More often used on sea defence and slipways.

Radius wave design shown here has 110mm (4.5") with a 25mm (1") depth. These floats can be weighted.

Other sizes of wave design are available to order.

Part No.	Size
390120	1200mm x 175mm

Multi-Trac Texturing Float

Cuts perfect grooves every time. Produces a uniform sharp groove in various concrete applications where water drainage and traction are critical. Particularly useful in agricultural applications where a smooth crown is required.

Texturing Floats include heavy duty knucklehead.

ALL FLOATS..... groove depth and width 1/4" x 1/4" (6mm x 6mm) - milled into the leading edge of blade.

Part No.	Size	Spacing
CC787	4' x 8" (1200mm x 200mm)	1/2" (12mm)
CC788	3' x 8" (900mm x 200mm)	1/2" (12mm)
CC790	4' x 8" (1200mm x 200mm)	3/4" (19mm)
CC791	3' x 8" (900mm x 200mm)	3/4" (19mm)
CC796	4' x 8" (1200mm x 200mm)	1" (25mm)
CC797	3' x 8" (900mm x 200mm)	1" (25mm)
CC793	4' x 8" (1200mm x 200mm)	2 1/4" (58mm)
CC794	3' x 8" (900mm x 200mm)	2 1/4" (58mm)

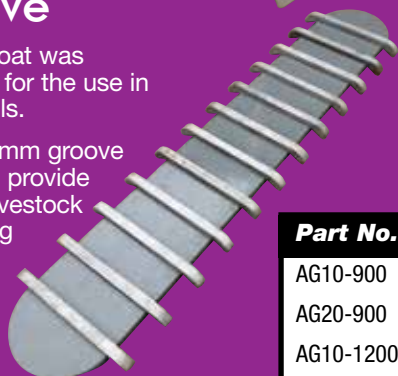

Add '-01' to part number for blade only.

Agri-Groove

The Agri-Groove float was primarily designed for the use in dairy parlors & stalls.

It forms a deep 20mm groove that is designed to provide excellent grip for livestock and allow for a long floor life where mechanical cleaners & scrapers are utilized.

Available in 900mm (3') & 1200mm (4').

Part No.	Blade Size	Groove Spacing
AG10-900	900mm	10mm
AG20-900	900mm	20mm
AG10-1200	1200mm	10mm
AG20-1200	1200mm	20mm
Add 'K' to Stock Code to include Knucklehead Gearbox		

Roller Tamp

A tool comprising single or twin mesh rollers which depress the major aggregate and bring fat to the surface. May be used for non-slip finish, leaving a diamond type pattern, e.g. car parks, cow yards, etc.

Supplied complete with 45mm snap handle adaptor.

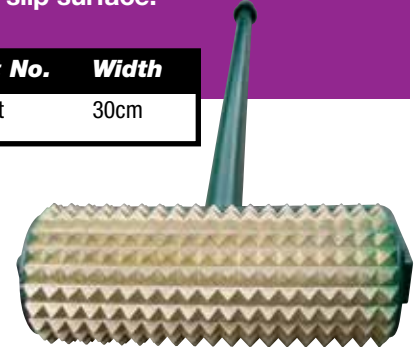

Part No.	Size
RG 24	600mm Double roller tamp
RG 36	900mm Double roller tamp
RG 24 S	600mm Single roller tamp
RG 36 S	900mm Single roller tamp

Indent Roller

High quality brass roller for non-slip surface.

Part No.	Width
Indent	30cm

Texture Rollers

Spread and screed the concrete as quickly as possible. Use a Multivibe screeder or a Roller striker to level the concrete. The use of a 'roller tamp' will help to work the fines to the surface and then use a magnesium bullfloat to work the 'fat' and smooth the surface ready to take the print. Apply liquid release to the surface of the concrete and the hexroller using our range of Mesto sprayers. Use the 'touch up' tool around the edges to make good where required.

Rock 'n' Roller

The Rock n Roller system is a unique texture imprint system design for decorative imprinting.

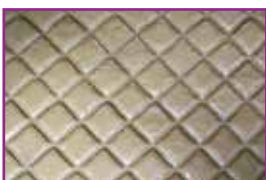

There are several styles and patterns available and matching border rollers for a perfect finish

Cobblestone

Wide Diamond

Hex Roller

Slip resistant flooring for livestock areas.

Now you can apply slip resistant surfaces to any freshly poured concrete, quickly and easily.

The 'hexroller' imprints a deep pattern which allows for easy run-off of liquids and maximum grip in any direction.

Part No.	Description
CYR/RA	Livestock Roller Starter Kit
LR	Liquid Release (20 litres)
HEXROLLER	Livestock Roller only
CC569	1/2" Wedge Touch-up Roller

Tamping

Magnesium Tamp Beams

Lightweight with less 'sag' than traditional beams.

Rectangular Box Section

125mm x 50mm (5" x 2")
- 16' and above.

100mm x 50mm (4" x 2")
- 12' and below.

Part No.	Length (m)	Length (feet)
CC410	3.0	10'
CC412	3.6	12'
CC419	5.0	16' 5"
CC420	6.0	19' 8"
CC424	7.3	24'
CC426	7.9	26'

Hi-tech Lightweight Magnesium Screed beam.

Unique extruded shape provides excellent strength and rigidity. Contoured shape facilitates hand screeding as it is easy to grip. Excellent where flatness tolerances are critical.

'Hour-glass' profile
115mm x 44mm
(4½" x 1¾")

Part No.	Length (m) (nominal)	Length (feet)
HMS10	3.0	10'
HMS12	3.6	12'
HMS15	4.6	15'

Aluminium Tamp Beams

Rectangular Box Section

125mm x 50mm (5" x 2")
- 16' and above.

100mm x 50mm (4" x 2")
- 12' and below.

Part No.	Length (m)	Length (feet)
CC410AL	3.0	10'
CC412AL	3.6	12'
CC419AL	5.0	16' 5"
CC420AL	6.0	19' 8"
CC424AL	7.3	24'

Easygrip Hand Screed

Rectangular Box Section

90mm x 40mm (3.5" x 1.5")

Part No.	Length (m) (nominal)
CC608AL	2.4 - Aluminium
CC608	2.4 - Magnesium

Tamp Beam Handles

Complete with rubber grips.

Part No.	Handle type
700174	Saw Beam Handles
700175	Aluminium - fixed height
700176	Steel - adjustable height

STRIKER™
Made of 100% Aluminum Alloy

Easy Grip
1-1/2" x 3-1/2" 2" x 5"

Saw Beam Handle

Adjustable height - Steel

Aluminium - fixed height

Aussie Combo

This innovative new tool can be used as a float, screed, or checking tool when you want just the right finish. Base of tool comes with a round edge for floating and a square edge for cutting and filling. Lightweight magnesium handles adjust for comfort.

Code	Size	Handles
CC421	1.2m x 35mm x 50mm	1
CC422	1.8m x 35mm x 50mm	1
CC423	3.0m x 35mm x 50mm	2

Concrete Tamper - 'Jitterbug'

Heavy steel bottom to prevent concrete splashing on legs during use. Welded at all contact points, rubber grips on handles.

Part No.	Width
CC889	900mm (3ft)

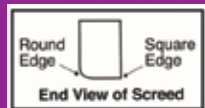

Buckaroo Straightedge

Straightedge for floating or striking off of concrete. Smooth tapered wooden handle includes top reading adjustable level vial for easy positioning. Base of tool has one round edge for floating and one square edge for cutting. Made from magnesium so very light.

Code	Size
CC421L	1.2m (35mm x 50mm)
CC422L	1.8m (35mm x 50mm)
CC428L	2.4m (35mm x 50mm)
CC423L	3.0m (35mm x 50mm)

Buckeye Straightedge

The Buckeye Straightedge hand screed is an innovative, one man, aluminium straightedge with a square profile for a multitude of tasks.

Code	Size
CC891	4' Buckeye Straightedge
CC893	6' Buckeye Straightedge
CC894	8' Buckeye Straightedge
CC895	10' Buckeye Straightedge

EZ Screed Tools

The new EZ Screed Tool used in an upright position is faster and more effective for concrete levelling (or sand), resulting in a more precise, professional finish. EZ Screed Tool is designed for footpaths, driveways and slabs of various sizes.

Features:

- Powder Coated Steel Handle
- Textured Grips
- Quality Aluminium bars
- Kit comes with 0.9m, 1.2m, 1.5m & 2.1m bars
- Quick Disconnect
- Durable & Affordable

Dapple Bar Kit

DBSS – comprises handle set and 3 bars (900mm, 1500mm & 2500mm).

All aluminium.

Self Levelling Kit

GG600 – Complete kit with all the items required to mix and install self levelling products. Includes:

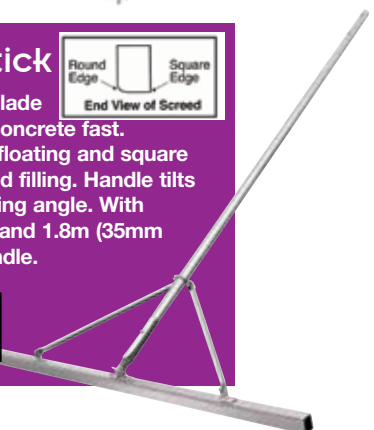

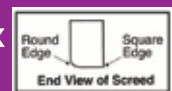

- Mixing barrel (GG601)
- Measuring jug (GG602)
- Oval mixer (DC717)
- Spiked shoes (HC178)
- Gauge rake head (CC975-01)
- Wood framed stainless steel smoother (GG603)
- 1.5m (3 section) Handle (CC263).

Whiskey Stick

1.5m Magnesium blade levels and places concrete fast. Rounded edge for floating and square edge for cutting and filling. Handle tilts to the correct floating angle. With heavy duty braces and 1.8m (35mm diameter) snap handle.

Code	Size
CC425	1.5m blade

Rakes & Placers

Lightweight Blue Texas Placer

All aluminium.

Blue or Gold?
Which do you prefer?

Part No.	Description
CC964	Lightweight 'right angle' placer

Lightweight Gold Texas Placer

All aluminium.

Part No.	Description
CC944	Lightweight aluminium placer

Aluminium Rake

These tools are lightweight and of rugged construction. This tool allows you to place the concrete where you want it.

You use the tooth side for raking - the smooth side for floating and screeding.

Part No.	Description
CC977	Aluminium Rake
CC977-01	Blade only
CC977-02	Handle only

Texas Placer

A heavy duty Grading Tool which will hold up under the toughest of jobs.

Blade is 500mm x 112mm cold rolled steel or aluminium.

Part No.	Description
CC978	Steel Placer
CC979	Aluminium Placer
CC978-01	Steel Blade only
CC979-01	Aluminium Blade only
CC977-02	Handle only

Dual Faced Magnesium Rake

Magnesium head, straight broom handle.

Part No.	Description
CC113	Magnesium 50cm x 10cm

Dual Faced Steel Rake

Steel head. Straight broom handle.

Part No.	Description
CC010	Steel 57cm x 13cm

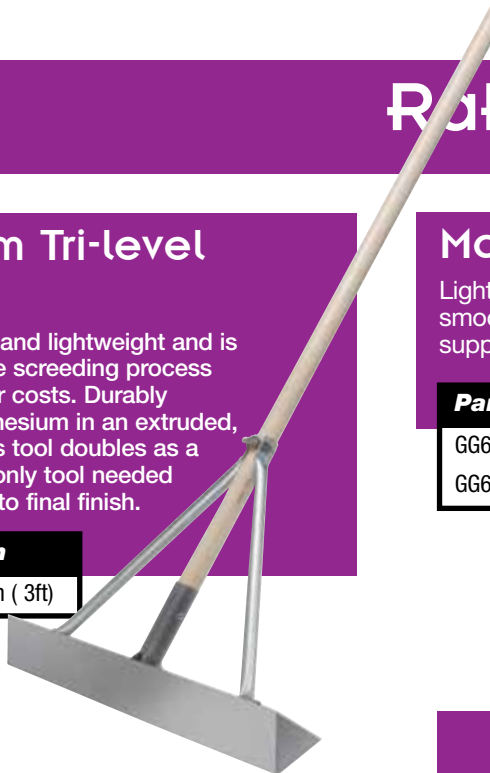

Rakes & Placers

Magnesium Tri-level Placer

This tool is versatile and lightweight and is designed to ease the screeding process and to reduce labour costs. Durable constructed of magnesium in an extruded, triangular shape, this tool doubles as a bull float and is the only tool needed on small slabs prior to final finish.

Part No.	Width
CC934	900mm (3ft)

Magnesium Asphalt Rake

Lightweight magnesium head, Standard teeth on one side and smooth edge on the other. 2.1m aluminium anodised handle with support braces.

Part No.	Width
GG626	900mm
GG627	1070mm

Rubber Squeegee

For removal of surface water/bleed water.

Supplied with 45mm Snap adaptor or wood handle.

Part No.	Width
GG236C	900mm (3ft) (curved)
370250	900mm (3ft)
370251	1200mm (4ft)
370256	1800mm (6ft)
370258	2400mm (8ft)

Floor/Form Scrapers

Contoured Wooden Handle

Part No.	Width/Description
CC214	350mm (14")
CC218	450mm (18")
CC222	560mm (22")
GG023	900mm (36")
GG024	1200mm (48")
Replacement blades available	

Radius Bender

Code	Description
CC980	Radius Bender

Snap Adaptor

Snap Adaptors with clevis end or threaded end (35mm or 45mm).

Part No.	Description
CC332	35mm Snap adaptor
CC284	45mm Snap adaptor
CC495	Quick-change converter
CC657	Single action bracket
CC658	Swivel action bracket

Quick-Change Convertor

Converts any hand tool – into a walking tool in seconds.

Thumb screws hold bracket securely in place. It fits all bronze and blue steel hand tools.

Trowel Bracket

Turns a normal concrete steel finishing trowel into a small Fresno. Just remove the handle and slide on the bracket.

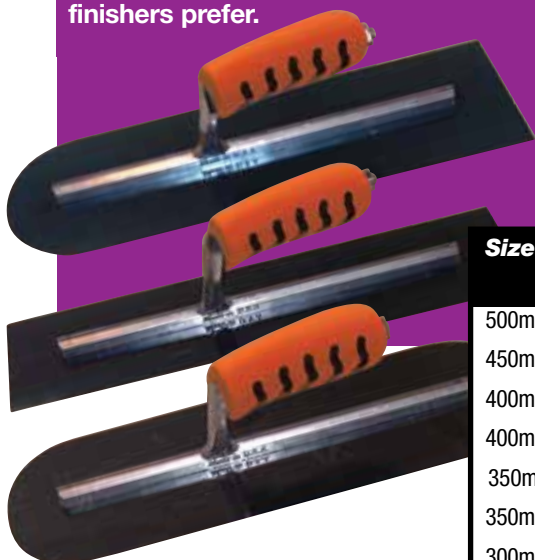

Hand Trowels & Groovers

Trowels

Blue Steel Trowels

Fine quality blue steel blade. Blue steel offers a little more flexibility which some finishers prefer.

Pool Trowel

This trowel is for the professional and made from Blue Steel. Pool trowels are fully rounded, and flexible to allow contour finishing.

Cement Trowel

Manufactured in Blue Steel, with a choice of trowel shape. These trowels are 'broken-in' by factory skimming of the underside of the blade.

Surface deformation measurement.

A straight edge used to determine lateral surface regularity of a road or floor surface etc.

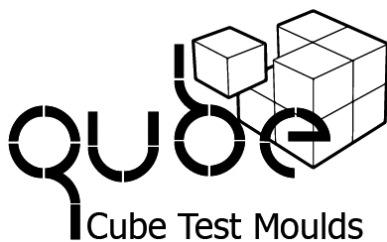

A lightweight straight edge equally supported at each end with an aluminium block, giving a set height between the concrete surface and straight edge.

Using the straight edge you can measure any vertical irregularity using an optional 2.5mm incremented wedge with a range of 12.5mm low to 12.5mm high.

- 2.0m or 3.0m lightweight aluminium straight edge with carrying loops.
- Optional metric graduated measuring wedges marked every 2.5mm available.
- Measuring range 12.5mm low to 12.5mm high

Product code	Description	Size
26550	2.0m straight edge c/w with support blocks. Add item 26570 for the complete kit.	2000mm x 76mm x 25mm
26555	3.0m straight edge c/w with support blocks. Add item 26570 for the complete kit.	3000mm x 76mm x 25mm
26570	Metric graduated wedge for measurement	

- Lightweight moulds
- Quick & easy to strip
- Re-useable many times.
- Recyclable
- 100mm & 150mm
- Lower freight costs
- No manual handling issues.
