

### Sound Specification

The required sound specification:

	SC10-90	SC10-120
The sound pressure level at operator’s location (LpA) 91 dB(A)	89dB(A)	91dB(A)
The guaranteed sound power level (LWA) 112dB(A)	110dB(A)	112dB(A)

These sound values were determined according to ISO 3744 for the sound power level (LWA) and ISO 11204 for the sound pressure level (LpA) at the operator’s location.

### Vibration Specification

The weighted effective acceleration value, determined according to ISO 2361-1 and ISO 5349, is:

	SC10-90	SC10-120
For whole body: 1.46m/s <sup>2</sup>	0.22 M/S <sup>2</sup>	1.46 M/S <sup>2</sup>
For hand arm: 2.95 m/s <sup>2</sup>	1.81 M/S <sup>2</sup>	2.95 M/S <sup>2</sup>

The sound and vibration specifications were obtained with the unit operating on fully cured, water wetted concrete at nominal engine.
