

# Concrete Covers

Our concrete tents can be hired to offer surface protection from rain damage and early curing on hot summer days, that literally costs thousands in reinstatement costs.

Our concrete covers are wedge shaped, and feature a low-slung design assists in the concrete covers ability to withstand winds of reasonable intensity.

Speed tents are available to hire in the 7 metre width x 5.5 metre length format. All other sizes are available for purchase only, and are manufactured to order.

The dimension tolerance allows for sufficient overlap to prevent water ingress onto the slab surface. For example a 7 x 5.5 metre tent will cover a bay width of 6 meters and a linear length of 5 meters.

A series of tents can be run to any desired bay length by alternating the standard and overlap tents down the length of your bay. The width of the tent is fixed.

Nominal Tent size:		To cover Bay size (approx):	
Width	Length	Width	Length
4.5m	6.0m	3.5m	5.0m
5.5m	7.0m	4.5m	6.0m
6.0m	4.5m	5.0m	3.5m
7.0m	5.5m	6.0m	4.5m
9.0m	7.0m	8.0m	6.0m

Simplistic in concept Speedtents offer exceptionally fast erect times and are compact enough to enable transport by a regular size pick concrete surface protection up truck.

A series of tents can be utilised to cover longer bays by using a combination of standard and over-lap units.
